Have an Emergency Plan

- Assemble a disaster supply kit.
- Locate safe places in your home for each type of disaster.
- Choose and practice an evacuation route and meeting place.
- Teach the family how to manually shut off utilities (gas, electric, etc.).
- Post emergency contacts on the refrigerator.
- Teach the family how to use a fire extinguisher and where to find one.
- Get certified in CPR!

Created 2024: V. Langford, TCS

Below you'll find some info and basic questions you can expect dispatchers to ask when you call 911. Every situation is unique, meaning more questions may be asked. Preparing yourself can mean a world of difference!

Fire

- What is the address of your emergency?
- What is on fire?
- Is anyone injured?
- How large is the fire?
- Are there any accelerants in the area?
- Is everyone accounted for?
- Is everyone a safe distance from the fire?

Law Enforcement

- What is the address of your emergency?
- What is currently happening?
- When did this happen?
- Is anyone injured?
- Who is involved?
- Any vehicles involved?
- Does anyone have a weapon?
- Is anyone intoxicated?
- Are there children present?

Medical

- What is the address of your emergency?
- How old is the patient?
- Are they biologically male or female?
- What is the current medical emergency?
- Are they breathing okay?
- Are they conscious?
- Are they alert?

CPR

CPR is scary! Try not to panic; if you don't know how, your local dispatchers will guide you step by step until help arrives. Below is a QR code with specific instructions from the Red Cross.

High-quality Chest Compression

- Chest compression fraction >80%
- Compression rate of 100-120/min
- Compression depth of at least 2-2.4 inches in adults and at least 1/3 of the chest in children and infants
- Avoid excessive ventilation

Chest compressions

Adult

press down
↓ 2 inches

Child

press down
↓ 2 inches

Infant

press down
↓ 1.5 inches

Perform 30 chest compressions at a rate of 100 per minute, letting the chest rise between each
